Dearest triend Ken:

Did you remember the popular video games we played together last month? Well, it was quite interesting! The imaginary characters inside were all well equipped, and the war between the prince and his evil uncle couldn't be more exciting! I can still vividly recall the stories in the video games. I was extremely fascinated by it at that moment.

However, I have heard that you kept playing it every day without paying attention to your studies. Oh, that's not good at all! I know the sense of accomplishment aroused after defeating the villians was beyond compare, but there's much more in life that is worth our attention. You can understand more about the world through reading as well as exercise your limbs by playing 背面可繼續作答

basketball on a regular basis, only to name a tew. Above all, we are senior high students. We shouldn't forget our responsibilities and just indulge in what we are interested in. I think we may do some leisure things after studying for a long time, but it's inappropriate to keep staying up late just for playing, right? Someone told me you were blamed by your parents for it. Don't be disappointed! They do care about you. They expect you to pay more attention to school studies rather than drowned in video games. Believe me, try to abandon video games and open the textbooks on your desk, and you'll surely learn more and easily pass the exam. your parents will be proud of you! And you'll be radiant with happiness promise you to play it again when you do better on tests next time! We can enjoy it together! But now, I need you to go back, to embrace what you have lost these days. Well goes the saying, "Time and tide wait for no man." We have limited time. However, there are lots of great things to be discovered in lite. Why not take a glimpse of another attractive flower? Video games are by no means the only choice. Now, take an optimistic attitude toward everything and stride forward without any hesitation. I'm quite sure you can curve out your own brilliant future! Yours truly, Jack
