

二.

If I were to select a book for summer break, I would choose "Leadership is a Choice", by Austin Young. I believe, from the front cover, that the book is set out to foster and cultivate the next generation of leaders. And from the indications mentioned, I would think that the book will start out with listing possible hampers one is likely to encounter during his or her journey to become a leader. Following with suggesting ways to nullify those fears and presenting methods to overcome the obstructs faced. The book is also likely to act as a step-by-step handbook to becoming a leader by showing requirements and steps to become one. Perhaps it also includes examples of prominent and renown leaders with their life stories. All in all, the content seems intriguing to me.

Reasons of my choosing "Leadership is a Choice" can be divided into two. First of all, my personality and character traits.

背面可繼續作答

I always had the urge to handle or breakdown an incident first hand, and my courageous, bold, but pliable nature can be suitable in either accomplishing knotty decision making moments or alleviating damage done. I consider a position of leader somewhat challenging, but I am also eager to engage in a more intensive learning of it, by consulting to the book of course. Secondly, I believe my previous experiences enable me to better relate to the topic, for the fact that I took part in various leadership camps and conventions, inclusive of one visiting Israel. With my possessed knowledge, contents about leadership will less likely to complicate and obfuscate me. Furthermore, the experience and proficiency I hold will only contribute to accelerating the learning process and guide me through the book more swiftly. Despite my strengths, I still am aware of my debility such as being clumsy and too tentative.

Recognizing the book as a supplement towards my complete personality and a tool to achieve success, I would like to read "Leadership is a Choice" with all my heart.
